

Rack Mount Set – 19"

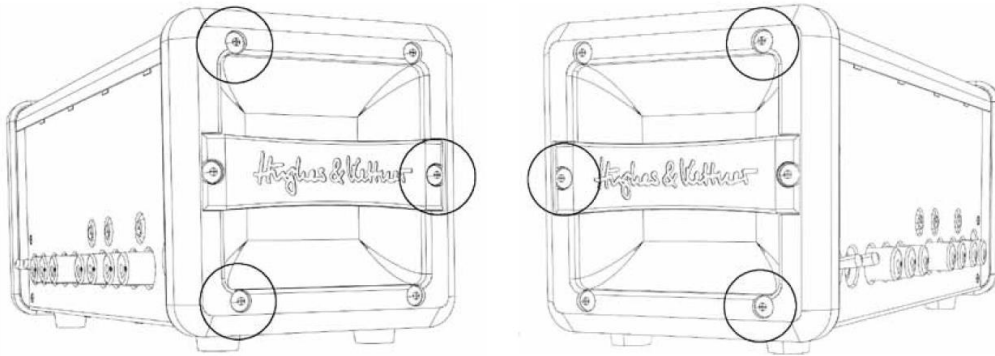

Mounting Instructions 1.0

RM-20: TubeMeister Deluxe 20

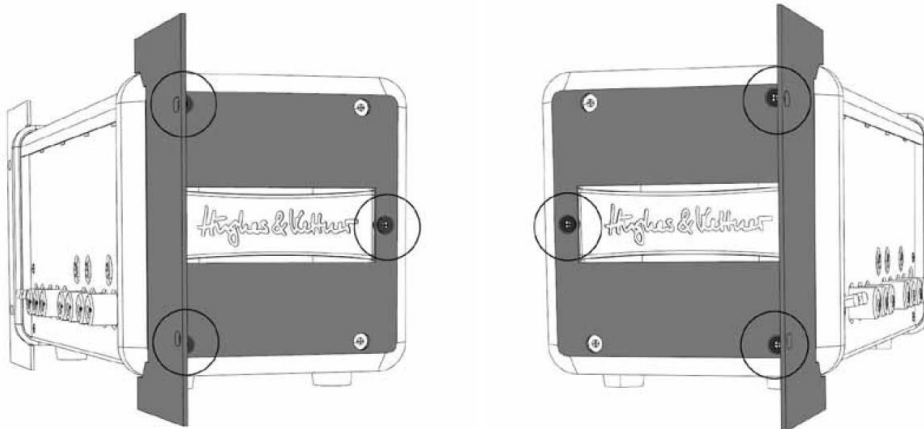

RM-40: TubeMeister 36, GrandMeister 36, GrandMeister 40

Please read before use and keep for future reference!
Heads up! Make sure the rack has adequate ventilation and cooling to prevent heat buildup. Procool fan model HK640B recommended.

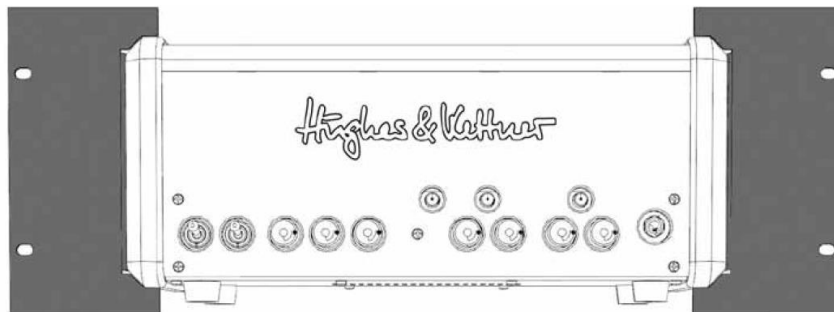

1. Place the amp on a stable surface and remove three screws each from the left and right panels of the housing as shown in the figure below.

2. Using the six screws removed, fasten the rack mounting brackets as shown in the two diagrams below.

3. Now you can mount the amp in a 19" rack..

Heads up! Make sure the rack is properly cooled.
Standard 19" rack fans are available at www.procool.com
Recommended fan model is Procool HK640B
