The Procool TV640E is designed for industrial applications that require high airflow in one 19" rack space.

Procool provides a wide variety of rack mount and cabinet cooling systems.

With 3, 4 and 6 fan systems built on a 1U platform to accommodate any application.

Visit [www.rackfans.com](http://www.rackfans.com) for a complete selection of cooling fan systems.

All Procool fans can be customized to the customer's specific requirements, including custom sized panels and colors.

Further customizing includes the addition of plugs and jacks into the panel for ease and convenience of interconnecting other components.

Call to discuss specific requirements.
